Controlled water rises*
 to -8 metres

Current water levels
 maintained at -12 metres
 with pumps and valves

- KEY**
- Rainfall refilling reservoir in 1 metre increments
 - Rainfall refilling reservoir in 0.5 metre increments
 - Rainfall refilling reservoir in 0.25 metre increments
 - Close monitoring by engineers
 - Testing and monitoring
 - Fish restock

Approximate timeline

* Reservoir will fill naturally with rainfall, controlled via dam valves and pumps. Timing of re-fill will depend on weather conditions.
