

# Origami Boat

Fun things to do: page 1 of 2

## What you need

A piece of  
A4 paper

Sticky Tape

Fold the paper in half to create a long thin strip with a central crease. Unfold. Fold both outside length edges in to the centre crease.

You should now have a 30 cm long thin concertina.

Place the concertina flat on a table with the edge with two folds away from you.

Fold down the top ends.

Turn over and repeat on the other side.

# Origami Boat

Fun things to do: page 2 of 2

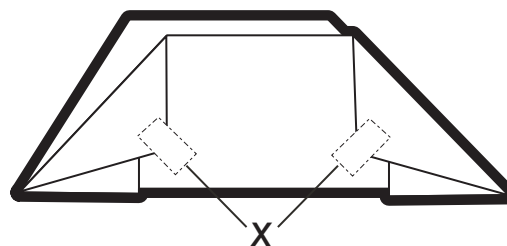

Fold both the top corners down again to create two further flaps about 2 cm deep. Score these folds with your thumb nail so the flaps stay flat.

4

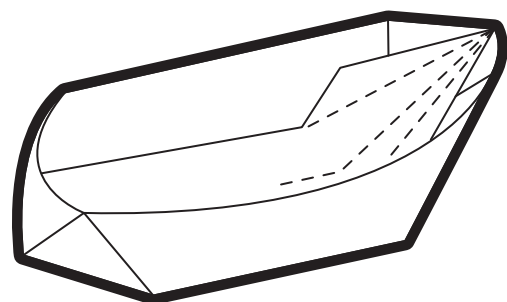

Turn over and repeat on the other side (apply sticky tape at x if you can't get the flaps to lie flat).

5

You now need to turn the paper inside out. Carefully move the edges away from each other on the long side at the bottom to create an upside-down boat shape.

6

Then press the top corners downwards and inwards with your thumbs.

Coax out the sides to produce a shallow boat shape, taking care not to tear the paper as you push the boat inside out.

Congratulations! You should now have a long shallow origami boat.
