

Design your own boat livery

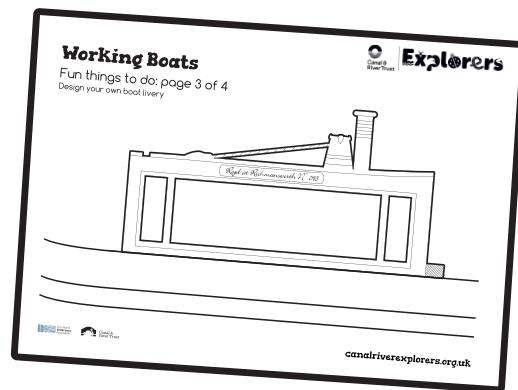

A livery is a bit like a school uniform for boats! Without even reading the name, people knew where the boat came from.

This was useful because not everyone on the canals could read!

1

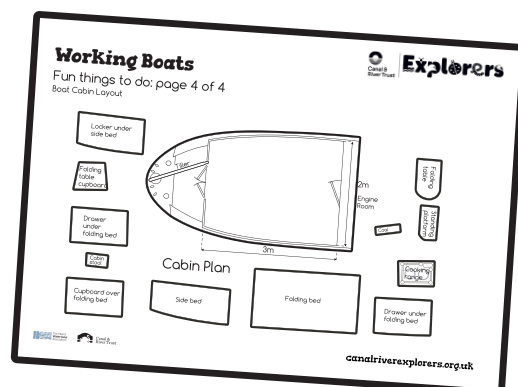

On sheet 3, use coloured pens or crayons to design your own livery for a working boat.

2

Plan a boat cabin

Cut out the furniture shapes from sheet 4 using scissors with rounded ends. Can you fit all these things into the back cabin in the right order?

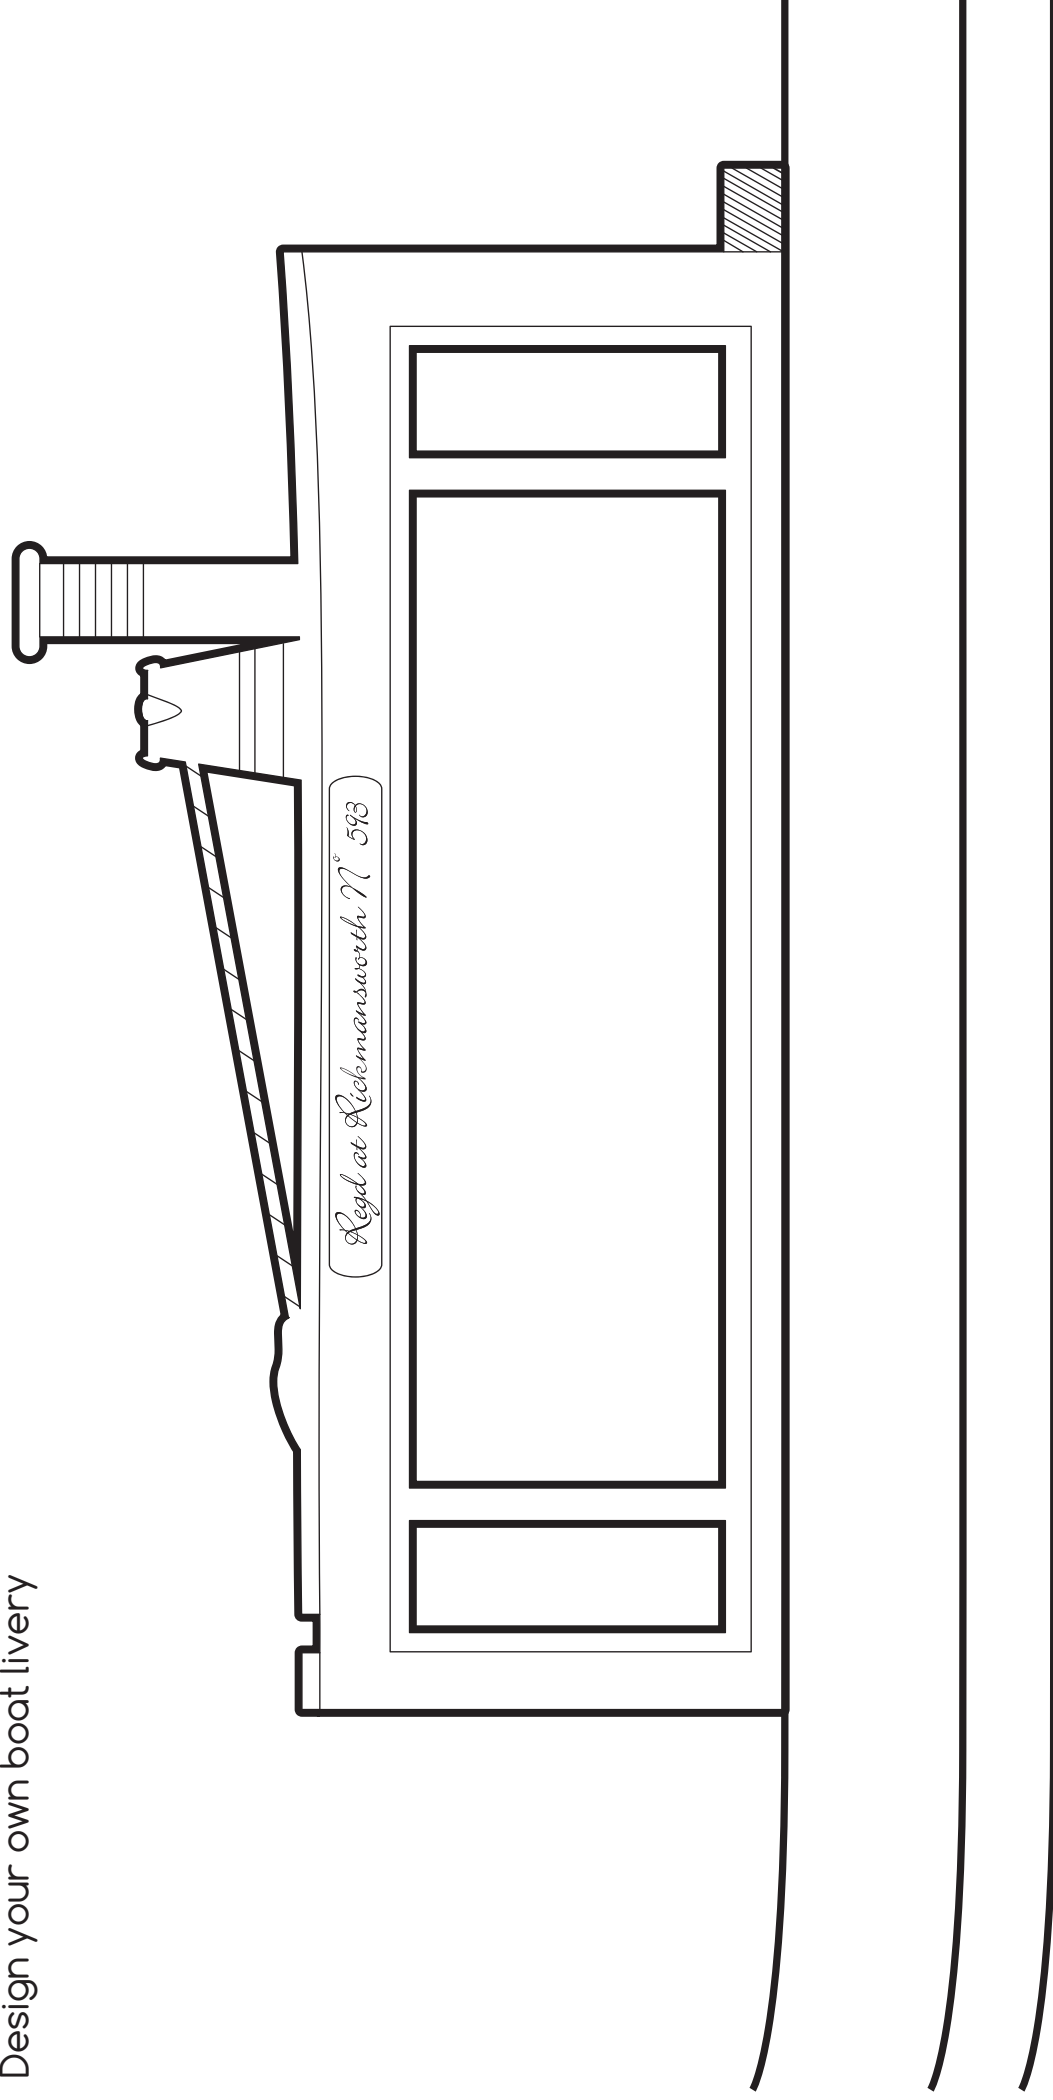

4

Did you manage to fit everything into the cabin? Would there have been room for anything else?
