# Additional Government advice

- On 22 February, the Prime Minister announced the Government’s roadmap to cautiously ease lockdown restrictions in England. The design of the roadmap has been informed by the latest scientific evidence and seeks a balance between our key social and economic priorities, whilst preserving the health and safety of the country. The scientific evidence shows that opening too early or too quickly risks a further lockdown.
- The approach focuses on data, not dates. Each step has a “no earlier than” date, 5 weeks later than the previous step, to allow time to assess the impact of the previous step and provide a week’s notice before changes occur. The steps for easing restrictions will be taken at the same time across England in a national approach, in the absence of a significant regional disparity.
- At each step the Government will make an assessment against the following four tests:
  - The vaccine deployment programme continues successfully.
  - Evidence shows vaccines are sufficiently effective in reducing hospitalisations and deaths in those vaccinated.
  - Infection rates do not risk a surge in hospitalisations which would put unsustainable pressure on the NHS.
  - Our assessment of the risks is not fundamentally changed by new Variants of Concern.
- From 29 March, as part of the first step, Stay at Home restrictions will be lifted. The Government will continue to advise that people minimise travel up to and including Step 3. This means avoiding making unnecessary journeys, combining trips and avoiding travel at peak times where possible. People should avoid travelling further than is reasonably necessary to take part in their activity - for instance visiting shops or making use of services closer to home.
- All references to permitted activities in the table above assume that boats allow for social distancing rules to be adhered to. COVID-Secure guidance will also remain in place up to and including Step 3 (subject to a proposed review of social distancing rules ahead of Step 4).
- Businesses and boats must not cater for groups larger than the legal limits at each step unless meeting the conditions for a permitted organised gathering. These will be reintroduced at Step 2 for outdoor gatherings and Step 3 for indoor gatherings. These gatherings or events must be operated by a business, charity, public body or similar organisation and can be organised subject to specific conditions: that they comply with COVID-Secure guidance including taking reasonable steps to limit the risk of transmission, complete a related risk assessment; and ensure that those attending do not mix beyond what is permitted by the social contact limits (unless another exemption exists, such as for organised sport or exercise, supervised activities for children or a significant life event).
- The definition of indoor and outdoor is guided by the legislation on smoke free premises. A place is indoors if it would be considered to be enclosed or substantially enclosed, for the purposes of Section 2 of the Health Act 2006, under the Smoke-free (Premises and Enforcement) Regulations 2006.
